

PostgreSQL

DuckDB

Source Seed from PostgreSQL: `SELECT * FROM t0 WHERE AGE(t0.c1, NOW()) > '1 year'::INTERVAL;`

Dialect

Conventional End-to-End Translation Methods

Step1: LLM Translation

`WHERE AGE(t0.c1, ...) > ...` ❌ Semantic Deviation

Step2: Unparsable Commenting

`WHERE /*AGE...*/ TRUE` ❌ Logic Loss

Morph: Structure-Aware SQL Transfer

Step 1: Query Logic Abstraction

`WHERE <TimeDiff> > <Interval>` ✅ Constraint Reasoning

Step 2: Dialect-Aware AQT Instantiation

`WHERE date_diff('year') > INTERVAL ...;` ✅ Logic Preserved
