

Source Seed from PostgreSQL: `SELECT * FROM t0 WHERE AGE(t0.c1, NOW()) > '1 year'::INTERVAL;`

Dialect

Conventional End-to-End Translation Methods

Step1: LLM Translation

`WHERE AGE(t0.c1, ...) > ...` ✗ Semantic Deviation

Step2: Unparsable Commenting

`WHERE /*AGE...*/ TRUE` ✗ Logic Loss

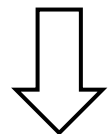

Morph: Structure-Aware SQL Transfer

Step 1: Query Logic Abstraction

`WHERE <TimeDiff> > <Interval>` ✓ Constraint Reasoning

Step 2: AQT-Guided Instantiation

`WHERE date_diff('year') > INTERVAL ...;` ✓ Logic Preserved
