

### Source AST

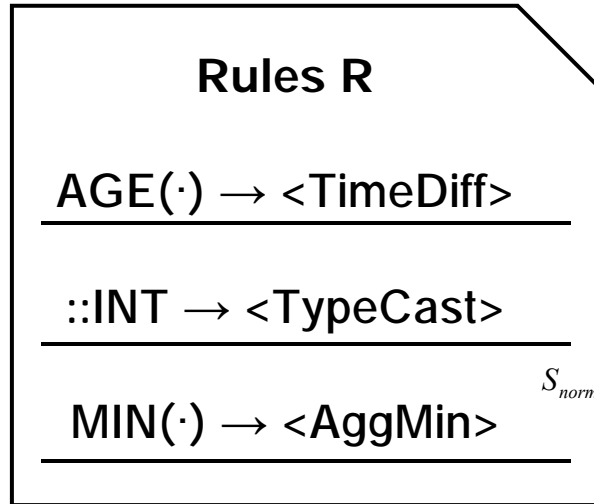

#### Boundary Detection

Identifies query boundaries  
Detects nested SELECT, CTE patterns

### Abstraction Engine

Input

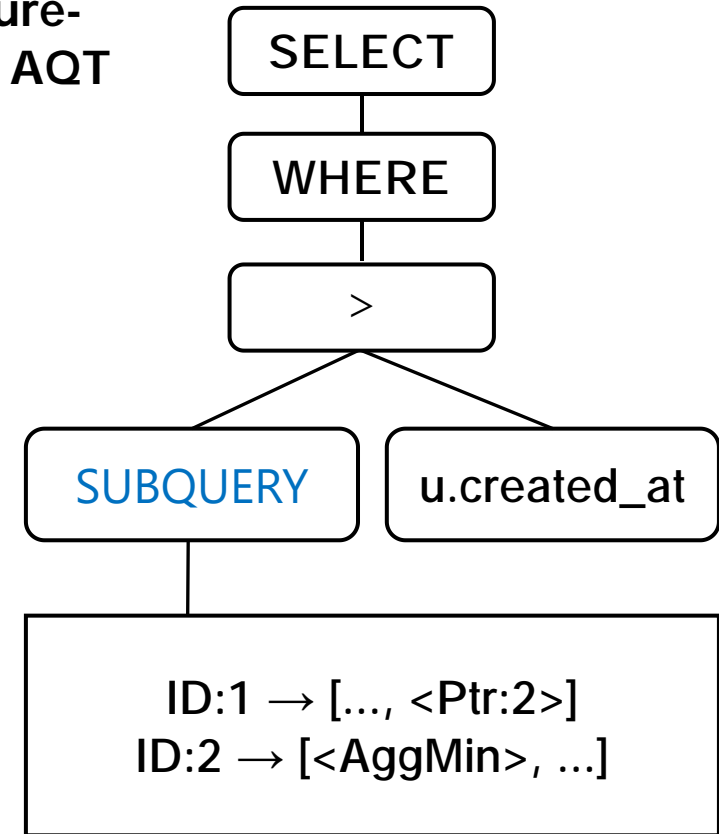

Discarded:  
AGE(), ::INT

Extract

#### Normalizes Dialect

Applies rules R  
(e.g.,  $\text{AGE} \rightarrow \langle \text{TimeDiff} \rangle$ )

### Structure-Aware AQT

#### Structure-Aware AQT

Creates matchable query representation  
Tuple  $\mathcal{T} = \langle U, \Delta, D, G_{tc}, \mathcal{H} \rangle$
